Dr. Deborah Boland

WHAT MAKES BE MOBILE NEUROLOGY DIFFERENT?

As an innovative response to traditional medicine, Be Mobile Neurology utilizes the Direct Pay Care (DPC) model, allowing unparalleled access to your physician through calls, texts, emails, video conferencing, and in-home, in-person visits for a flat, affordable monthly membership fee.

DPC is a form of health coverage that does not rely on health insurance, instead giving the physician the flexibility to offer personalized service and the patient more medical and financial control. Compared to traditional insurance billing, the DPC model provides patients with cost savings and the freedom to visit their healthcare provider as needed.

Neurologist Dr. Deborah Boland, D.O., MSPT, has a passion for improving every patient's quality of life, and her goal is to lead the movement back to patient-centered, individualized care.

THE ADVANTAGES OF THE DPC PAYMENT MODEL

- More access to care, regardless of age, pre-existing conditions, insurance coverage, or nature of the illness
- Increased dedicated time with your physician
- No insurance hassle or denials for neurologic physician care
- More transparent cost of physician care with the monthly membership
- Reduced cost of care overall
- More efficiency and convenience in scheduling appointments
- Better health outcomes through better access to physicians
- Better overall quality of care
- Emphasis on patient choice
